

FIRE & BURN SAFETY TIPS FOR CHANUKAH

ת"ב

The Menorahs

• Remove anything that may catch fire from the areas near the menorahs. Be sure to remove curtains, blinds, bedding, decorations, and children's projects from the areas of the menorahs.

• Make sure the menorahs are sturdy and level, and will not tip.

• Don't use menorahs made out of flammable materials such as wood.

• Make sure small children stay away from the menorahs.

• Prepare a fire extinguisher or bucket of water in case of emergencies CH"V.

• Check your smoke detectors.

• House fires tend to occur more often during the winter months. Prepare an escape plan and frequently rehearse it with your family.

• **Never leave burning candles unattended.**

In the Kitchen

• When frying latkes or doughnuts, keep children away from the hot oil, and be careful!

• Don't leave cooking food unattended.

• Take precautions when handling hot pots and pans. Use oven mitts or potholders.

• Turn frying pan handles away from the edge of the stove and try to use the back burners.

• Keep the area around the stove clear of towels, papers, pot holders or anything that could burn.

• Create a "child-free safety zone" of at least 3-feet from the front of the stove.

Let's Talk About Burns

Please note that the information here is only for slight burns affecting a small area. For any significant burn call Hatzolah immediately. If you are unsure whether Hatzolah is needed for a burn, always err on the side of caution and call.

There are three common kinds of burns:

- **Superficial thickness (first-degree)** - redness and some pain.
- **Partial thickness (second-degree)** - blisters and usually more pain.
- **Full thickness (third-degree)** - charring of skin, sometimes with loss of sensation of pain.

The information below is for minor first and second degree burns only.

• Skin continues to burn for a while after the heat source has been removed. It is of utmost importance to begin cooling the burn as soon as possible. A burn that is left untreated can continue to get worse.

• Burns can be cooled by running cool water (but not too cold) on the affected area, by immersing the burn in cool water, or by covering the area with a cool, wet towel. When using the immersion or towel method, it is necessary to periodically re-cool the water or towel.

• Do not put creams on fresh burns, since the creams can actually trap in heat and make the burn worse.

***Wishing you a safe, healthy, and happy Chanukah,
from all of us at Hatzolah.***

FIRE DEPARTMENT'S TOP THREE FIRE SAFETY TIPS	
1	INSTALL SMOKE ALARMS & CARBON MONOXIDE DETECTORS
2	HAVE A HOME FIRE ESCAPE PLAN
3	CONDUCT A SAFETY INSPECTION
